

# Getting Started with Web Development with Django

Reza ShalbafZadeh  
IrPycon  
Feb 2018 - Tehran - IUST

# Who am I ?

- Reza ShalbafZadeh
- Software Developer and DevOps Engineer
- Working in Miare

# Some Stats About Miare

- About 15000 commits
- More than 1300 tests on Django
- More than 2M Request Per Day
- Join US! [sazary@miare.ir](mailto:sazary@miare.ir)

D is silent!

/dʒæŋgʊ/

# What we gonna Learn?

- How not get scared in current state of Web
- Basic Web Development Concepts
- What is Django and how to learn it

# Software World

- Mostly Web Applications and Applications this days

# Internet ,Web and ...

# But first let be clear

- It 's **HARD**

VERY HARD

BUT

**POSSIBLE!**

# LEARN TO LEARN:

- Yak Shaving
- Bike Sheding

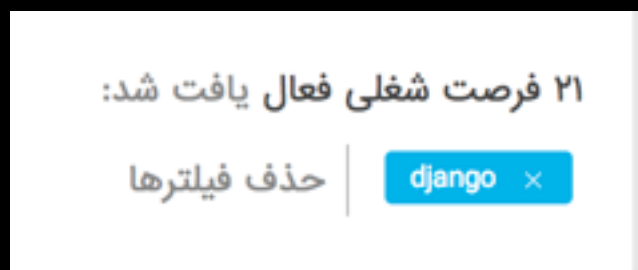

# Necessary Skill Set

# Job Market in Iran

Very High Demand with Very Low Supply

# Job Market in The World

- Very Good
- Many Big names , Instagram , Disqus, Bitbucket,NASA

**Ok back to track**

# What is a library

A software library is a suite of data and programming code that is used to develop software programs and applications. It is designed to assist both the programmer and the programming language compiler in building and executing software.

# What is a framework

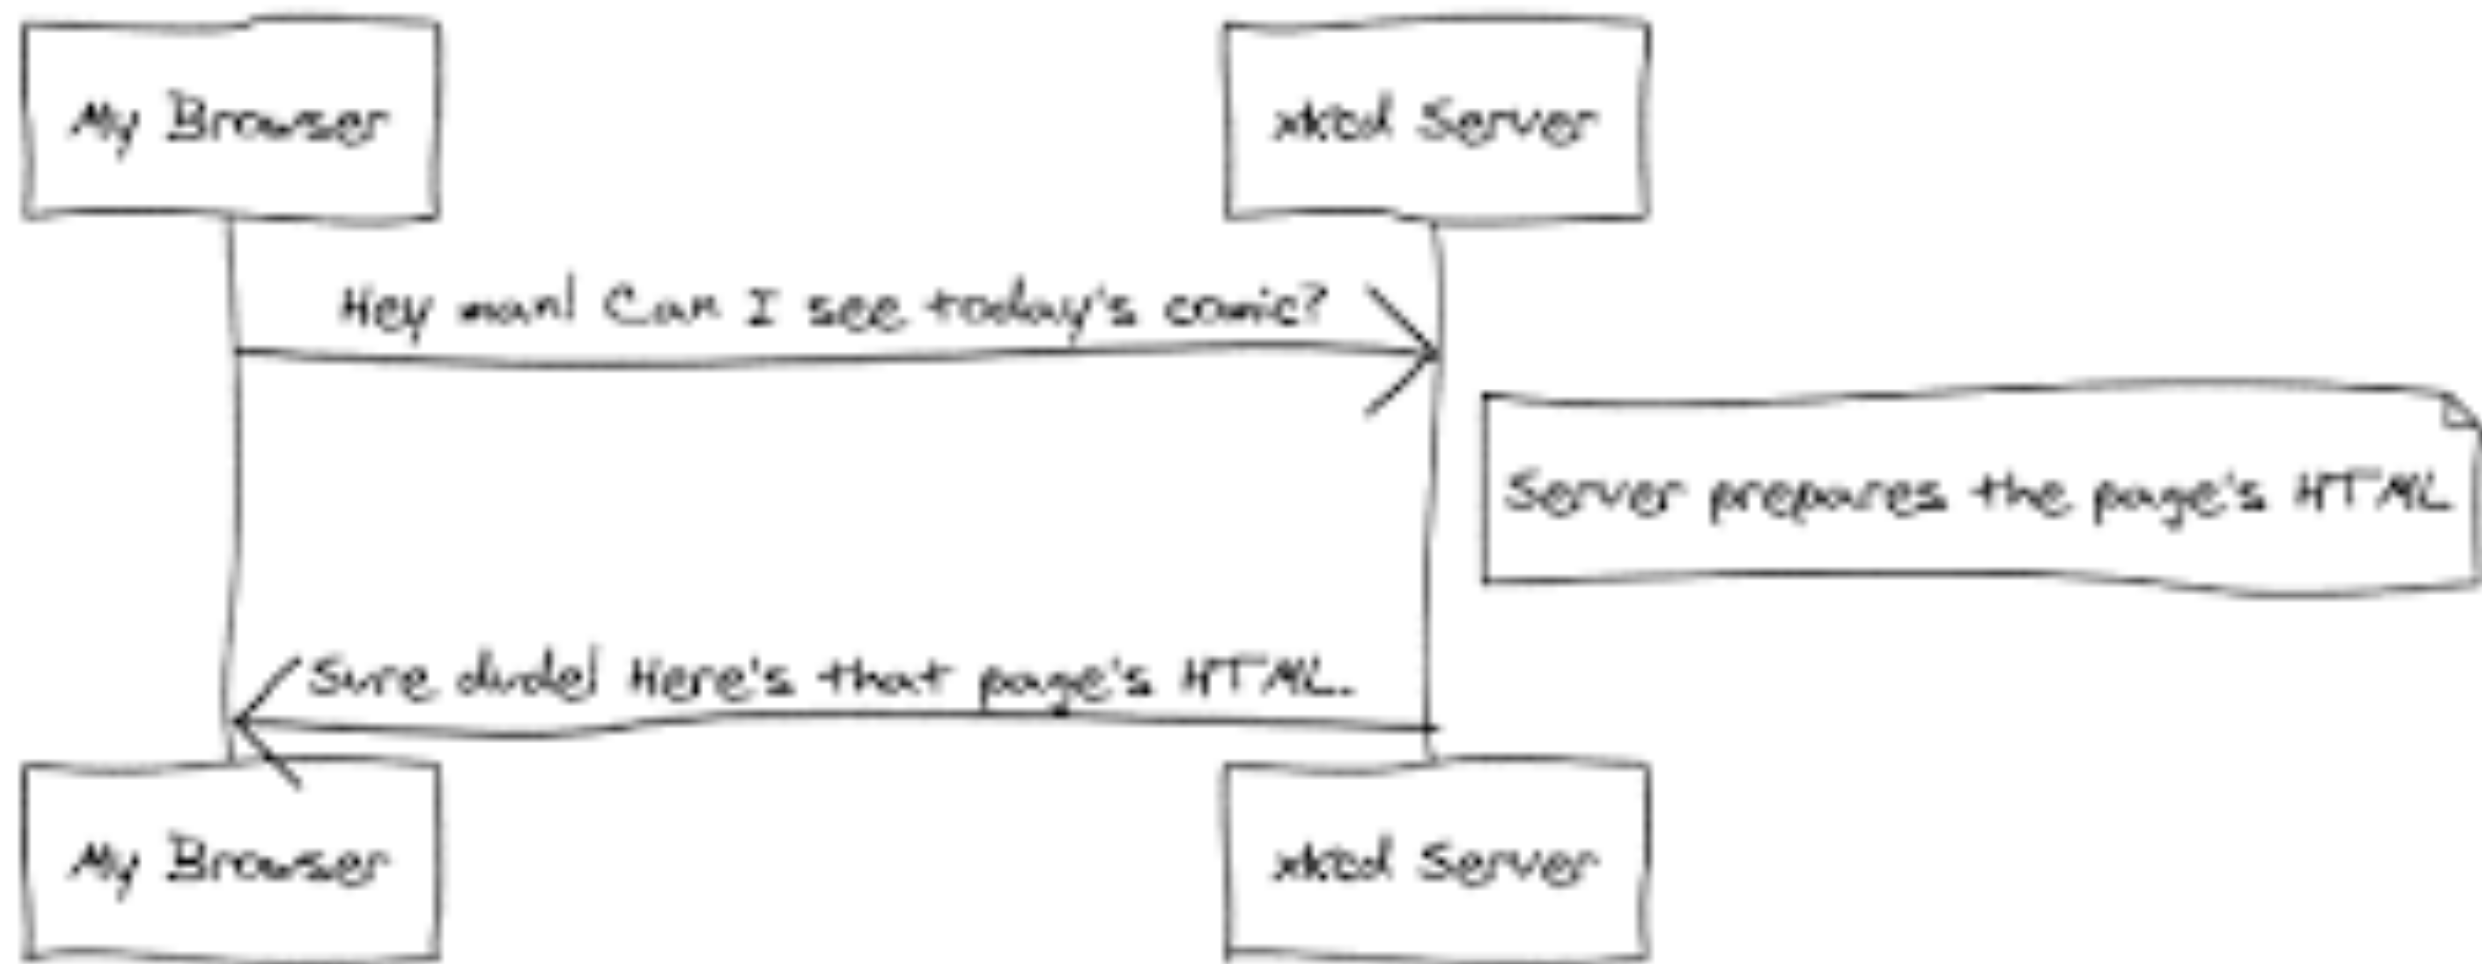

In computer science, a software framework is an abstraction in which software providing generic functionality can be selectively changed by additional user-written code, thus providing application-specific software. A software framework provides a standard way to build and deploy applications.

# Our Toolset

- Pip
- Virtualenv
- Git

# World Wild Web

# HTTP

# How it Works

# Request - Response

# Backend - Frontend

# Lets dive in backend

# Why Python

- It's easy
- A lot of libraries for almost anything
- Strong Community
- Close to human language

# Django

# Who uses Django?

- Instagram
- Disqus
- Bitbucket
- Nasa
- Eventbrite

# A bit of history

- Goes back to 2005
- Evolved Since

# Django Principles

- **Less code**
- **DRY**
- **Quick development**

Explicit is better than implicit

- **Convention over Configuration**

# MVC Pattern

# MTV vs MVC

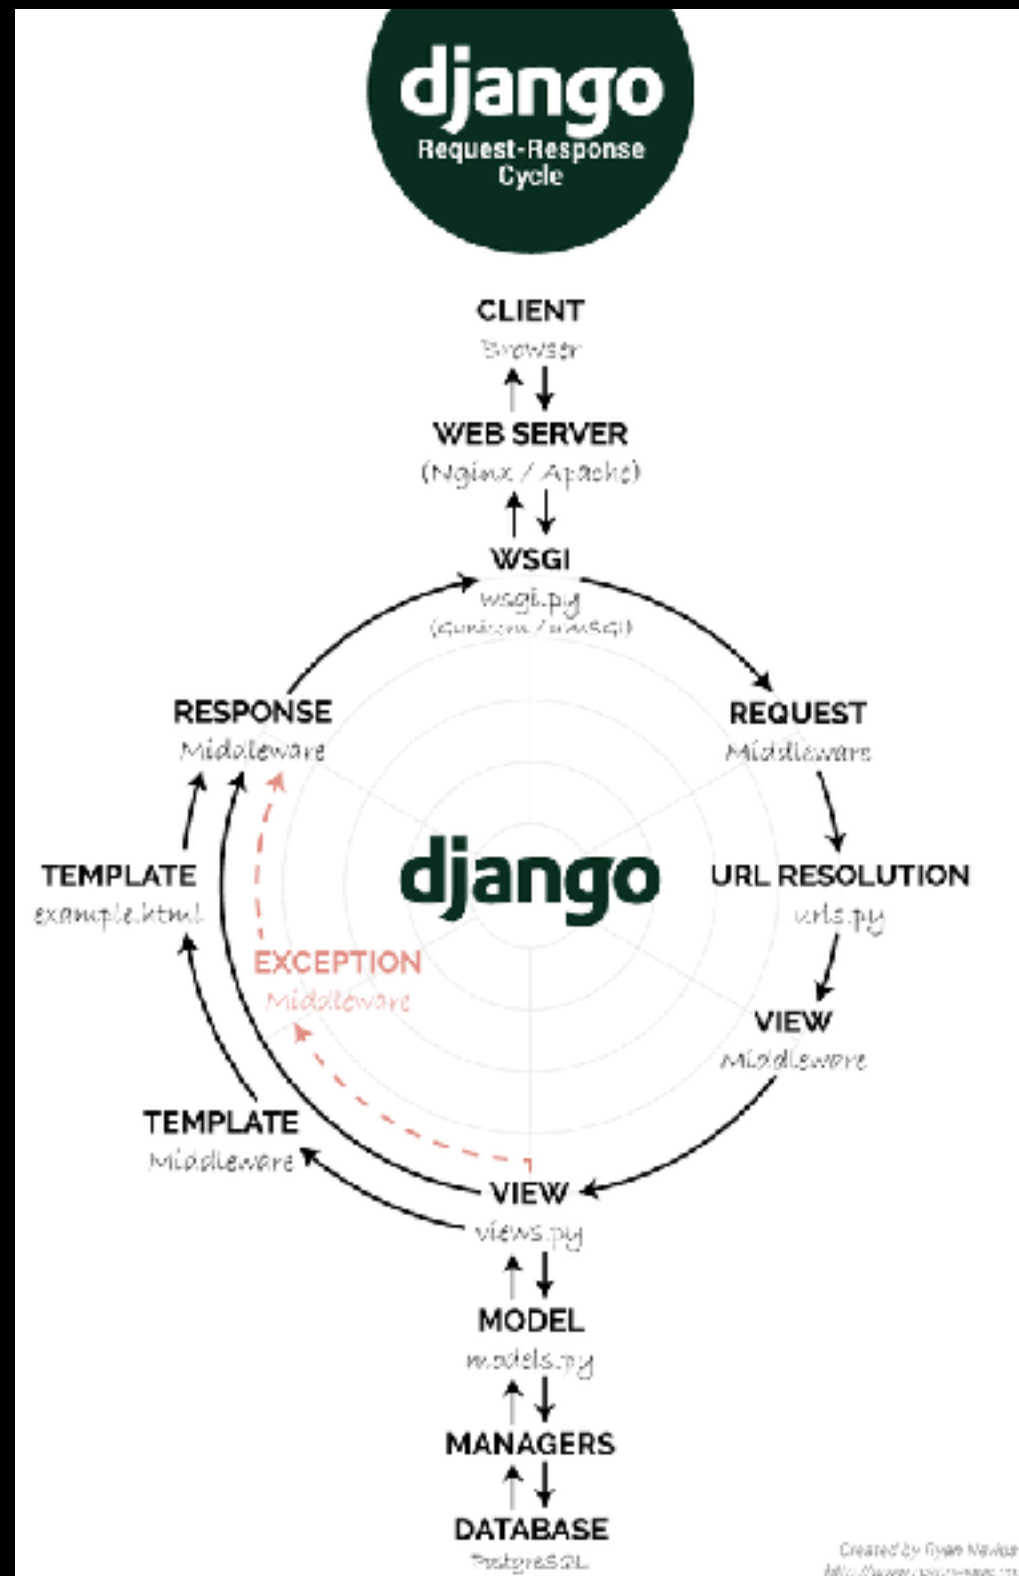

## MVC vs. MTV

Model --> Model

View --> Template

Controller --> View

# Django Under the hood

# Two Approaches:

- Django as a RESTful API
- Django as a full stack framework

# A bit of SQL

```
CREATE TABLE STATION  
(ID INTEGER PRIMARY KEY,  
CITY CHAR(20),  
STATE CHAR(2),  
LAT_N REAL,  
LONG_W REAL);
```

```
INSERT INTO STATION VALUES (13, 'Phoenix', 'AZ', 33, 112);  
INSERT INTO STATION VALUES (44, 'Denver', 'CO', 40, 105);  
INSERT INTO STATION VALUES (66, 'Caribou', 'ME', 47, 68);
```

```
SELECT * FROM STATION;
```

ID	CITY	STATE	LAT_N	LONG_W
13	Phoenix	AZ	33	112
44	Denver	CO	40	105
66	Caribou	ME	47	68

```
SELECT * FROM STATION  
WHERE LAT_N > 39.7;
```

ID	CITY	STATE	LAT_N	LONG_W
44	Denver	CO	40	105
66	Caribou	ME	47	68

# A sip of SQL

```
CREATE TABLE "people_person" (  
    "id" integer NOT NULL PRIMARY KEY,  
    "first_name" varchar(300) NOT NULL,  
    "last_name" varchar(300) NOT NULL,  
    "bio" text NOT NULL,  
);
```

# Django ORM kicks in

```
from django.db import models

class Person(models.Model):
    first_name = models.CharField(max_length=300)
    last_name = models.CharField(max_length=300)
    bio = models.TextField()

    def __unicode__(self):
        return ("%s %s") % (self.first_name, self.last_name)

    class Meta:
        ordering = ["last_name"]
        verbose_name = "Person"
        verbose_name_plural = "People"
```

# Django URLs

`http://www.mysite.com/post/12345/`

`^post/(\d+)/$ >> 12345`

# See This!

- [https://github.com/codingforentrepreneurs/Guides/blob/master/all/common\\_url\\_regex.md](https://github.com/codingforentrepreneurs/Guides/blob/master/all/common_url_regex.md)

# New Style of Url Patterns

polls/urls.py

```
from django.urls import path

from . import views

urlpatterns = [
    # ex: /polls/
    path('', views.index, name='index'),
    # ex: /polls/5/
    path('<int:question_id>/', views.detail, name='detail'),
    # ex: /polls/5/results/
    path('<int:question_id>/results/', views.results, name='results'),
    # ex: /polls/5/vote/
    path('<int:question_id>/vote/', views.vote, name='vote'),
]
```

# Django Views

```
from django.http import HttpResponseRedirect
import datetime

def current_datetime(request):
    now = datetime.datetime.now()
    html = "<html><body>It is now %s.</body></html>" % now
    return HttpResponseRedirect(html)
```

# Settings

- DATABASE, TIMEZONE , l10n,i18n,

# Django Admin

- You just need few lines of code!

# What about Security?

# Django Ecosystem

- *Awesome Django*
- Django Packages
- Etc etc etc

- <https://gitlab.com/rosarior/awesome-django>

# Django Packages

# Hands On Time!

# Where to go now?

- <https://developer.mozilla.org/en-US/docs/Learn/Server-side/Django> ( a Great Tutorial from Mozilla
- <https://jadi.net/tag/%D8%A8%D8%B3%D8%AA%D9%88%D9%86/>  
(Bestoon by jadi for getting started with django from scratch )

- <https://djangobook.com/> ( a good book for beginners)
- <https://hackr.io/tutorials/learn-django> ( list of courses)
- Deploy Django to real world
- Learn Django REST Framework in persian([https://www.aparat.com/kasaie/%D8%B3%DB%8C%D8%AF%D9%85%D8%AD%D9%85%D8%AF%D8%B1%D8%B6%D8%A7\\_%DA%A9%D8%B3%D8%A7%D8%A6%DB%8C\\_%D8%B4%D8%B1%DB%8C%D9%81%DB%8C](https://www.aparat.com/kasaie/%D8%B3%DB%8C%D8%AF%D9%85%D8%AD%D9%85%D8%AF%D8%B1%D8%B6%D8%A7_%DA%A9%D8%B3%D8%A7%D8%A6%DB%8C_%D8%B4%D8%B1%DB%8C%D9%81%DB%8C))

- <https://www.digitalocean.com/community/tutorials/how-to-set-up-django-with-postgres-nginx-and-gunicorn-on-ubuntu-16-04> (Deploy Django in Real World on VPS)

- Learn Git (<https://jadi.net/2017/10/git/>)
- Learn MVC By Taha Kamkar(<https://dutymess.github.io/laravel-0-to-60/chapter01/lesson01/mvc/>)
- Think Python Persian ( Great for beginners)
- <https://behroozam.github.io/persianthinkpython/>

# Other Resources

- Two Scopes of Django ( A Great book to learn almost every aspect of Django from beginning , highly recommended )
- <https://docs.djangoproject.com/en/2.0/ref/models/fields/>  
(Reference of Django Models)
